RE: Science City Urban Infrastructure Project -- TIGER VI Grant Assistance

Dear Secretary Foxx:

It has come to our attention that the Puerto Rico Science, Technology and Research Trust (**Trust** hereafter) will be supporting the application of the Puerto Rico Infrastructure Financing Authority (**PRIFA**) seeking funding from the TIGER VI program. We are, at present, a tenant of the Trust's Innovation Building, where we have co-located XOZZER dedicated to develop an intelligent sports performance app.

It our understanding that the TIGER VI program will have an important and direct impact upon the Science City Urban Infrastructure Project through the construction of the **Science City Boulevard**. This Boulevard, in turn, will connect the Science City to important landmarks of Puerto Rico's science and technology field, including the Comprehensive Cancer Center and other important facilities in the surrounding area. As such, the project merits your full consideration because of its profound potential to increase Puerto Rico's competitive edge in the knowledge economy.

As such, we fully endorse this project for the construction of the Science City Boulevard.

Cordially,

Marysel Garcia

Cofounder
XOZZER, Inc.
